

RAW / BROWN COCONUT

Sourced from the lush coastal belts of Telangana and Andhra Pradesh, Bizrak Impex exports premium-grade raw green coconuts and mature brown coconuts. Each coconut is selected for its high water content, purity, and kernel richness

Our coconuts are processed through modern de-husking, cleaning, and grading units that maintain hygiene and freshness. The young green coconuts are known for their natural electrolytes and refreshing taste, while the mature brown coconuts are prized for oil extraction, confectionery, and culinary use.

We provide export packaging that minimizes moisture loss and damage during long-distance transport. Whether for beverage industries, retail, or bulk buyers, our coconuts represent quality, authenticity, and freshness from India's coasts
