

ELEPHANT FOOT YAM

The Elephant Foot Yam, or “Suran,” is a highly nutritious tropical tuber and one of India’s important export root crops. Bizrak Impex supplies premium-quality yams cultivated in rich, organic soils.

Our farmers follow natural cultivation practices that produce firm, healthy yams with high starch and low moisture content — ideal for export. After harvesting, each yam is cleaned, trimmed, and treated to prevent decay. Yams are then carefully graded and packed to ensure they reach global markets in perfect condition.

Known for their long shelf life and culinary versatility, our yams are used in traditional dishes, processed foods, and health products worldwide. Bizrak Impex ensures reliability, purity, and superior quality in every shipment.
